FORTY-FIRST ANNUAL REPORT  
OF THE  
TRUDEAU SANATORIUM

---

REPORT OF THE PRESIDENT

THE Trudeau Sanatorium is forty-two years old. Its history is the history of the science and treatment of tuberculosis during these forty-two years.

At first it accepted and cared for only the slightest and most incipient cases of the disease because in those early days these were the only cases that were considered to be curable or even susceptible of any marked improvement. When they had passed beyond this stage they were regarded as practically doomed.

Today the general type of cases in the Sanatorium has materially changed and the treatment, too, has changed.

In the first place you would find there a large number of persons with more advanced tuberculosis and you would find a larger number of patients in bed. This is because, in the first place, our knowledge of the disease and our ability to cure or improve it has developed and so our services are given to a large group which they formerly did not reach.

In the second place, the value of absolute rest in bed especially is much better appreciated now than formerly. In the early days not more than 10 per cent of the patients at any one time would be found in bed; today at least 30 per cent are to be found there. This of course has added to the burden and expense of the institution but it has added proportionately also to its usefulness. We must have more doctors, more nurses, more laboratories, more *x-ray* facilities than in the old days.

In the beginning the place resembled a boarding-house where the boarders were under mild supervision; today it is more like a cottage hospital about one-third of whose patients are bed cases. This must inevitably increase enormously the labor and the cost, but has been rendered necessary by the march of human progress, and this progress "Trudeau" has always aimed to keep abreast of or even in advance of.

Fortunately, by studied efficiency and strictest economy and business methods for which we are indebted to our executive staff, and especially through the continued and ever increasing generous support of the friends of the institution we have been able to keep abreast of the times and at the same time to widen the scope of our work, and all of this without incurring a debt.

Today we have a steady census of 170 patients, in the summer even more, and about 50 infirmary beds which are constantly occupied.

The new Ludington Memorial Infirmary especially has been a blessing. It is functioning perfectly and we believe is the finest and most perfect structure of this kind in existence. The new fireproof laboratory is also a model of efficiency and we are gradually bringing our various buildings

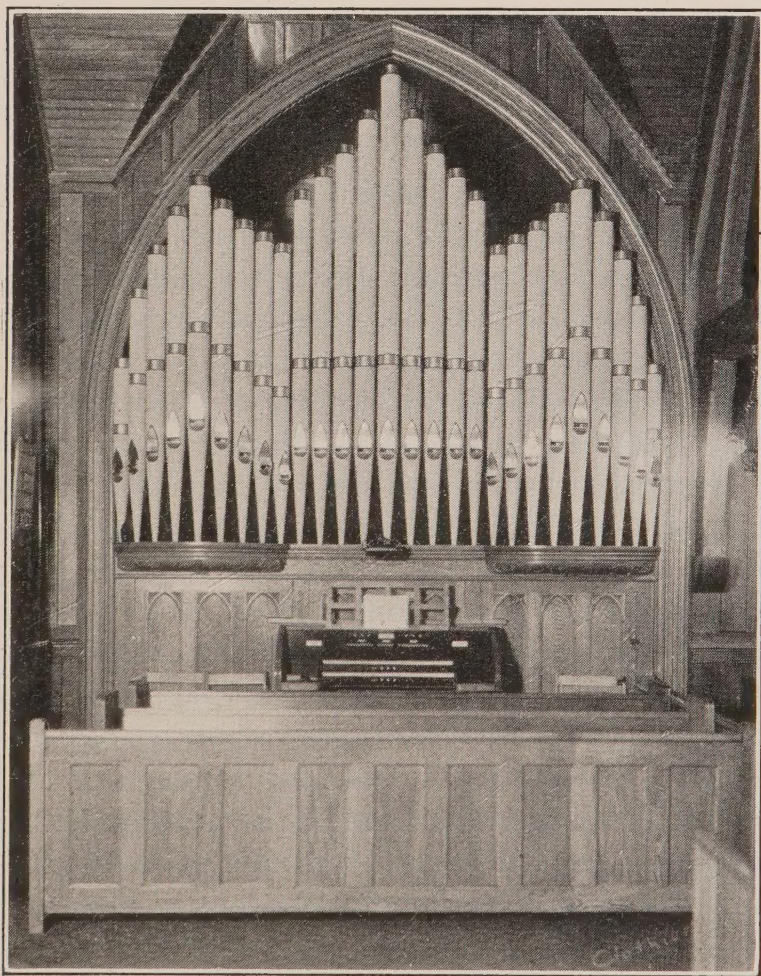

into a satisfactory state. Among other improvements we are aiming to put fireproof, permanent roofs on all of our many buildings and thus lessen the cost of insurance and diminish the annual repair account.

All of these many blessings we owe first of all to the marvelous impulse given to the institution at its very birth by its founder Dr. E. L. Trudeau and by the spirit that he breathed into it, a spirit taken over by his successors—a band of devoted men and women who give up their lives to the service of the institution including both the professional and non-professional staff. Second, to the wonderful backing and support always lent to it by the large and increasing circle of friends and supporters.

This year we have no urgent structural needs, but in the summer we shall have again to ask for some modest support to help meet the inevitable deficit in running expenses brought about by the need of keeping the Sanatorium fully abreast of the times in the study and treatment of tuberculosis.

Meantime we shall go on treating our 170 cases by every means known to modern science and all the time diligently prosecuting research studies in the wards and in the laboratories in order to advance by every means in our power the world's knowledge of this dreaded scourge.

WALTER B. JAMES, M.D.,  
*President.*

THE NEW CHAPEL ORGAN

1925

PRESENTED BY 1900 EX-PATIENTS

## ANNUAL REPORT OF THE CHAIRMAN OF THE EXECUTIVE COMMITTEE OF THE TRUDEAU SANATORIUM

AT THE ANNUAL MEETING, DECEMBER 21, 1925

IN some respects the Sanatorium entered a new era in 1925. This was due to the recognition of the need for more bed rest for patients with slight symptoms of active disease.

The beautiful new Ludington Memorial Infirmary, opened April 9, brought 32 more beds for the sick, which are constantly filled, making a total of 50 infirmary beds or nearly one-third of the whole number of 170 patients now treated. Over 500 patients were under treatment in 1925 and 330 were discharged, yet the waiting list continues long and causes serious delay in admission. The total number of patients treated in the institution will soon pass 7000. The large increase in the capacity of the Sanatorium adds to the responsibilities of the medical and executive departments and to the financial needs.

Aside from the wider usefulness of the Sanatorium witnessed by these figures, it is well to point out that the institution is engaged in salvaging lives at a productive age. We are not treating a degenerative disease of middle life or of old age, where only palliation is sought or obtained. Our statistician is in touch with 2335 living and actively employed graduates of Trudeau.

*Maintenance.* In keeping with other changes the standards of food and service are higher than ever. The raw food costs increased from 29 cents to 0.304 cents per meal; the *per capita* cost per week from \$17.36 to \$18.00, and for nursing from \$7.55 to \$7.59, with an average patient population of 170, besides 27 employed ex-patients.

However, the higher rate was chiefly due to loss of revenue from the closure of the Childs Infirmary for a month as well as other cottages for the purpose of extensive renovation and for the housing of nurses. The long-needed repairs were only made possible by moving all the infirmary patients directly into the new Ludington Memorial when it was opened in April. While the variety and quality of the food served is at present far better than ten years ago and the culinary department has of necessity steadily advanced the cost *per capita*, yet the chief item is higher wages; for with larger numbers the food costs are proportionately less.

The fuel question has engaged our attention considerably and small sizes of anthracite are now being used successfully in the larger furnaces. Many grates will need changing but the cost of coal may be materially reduced. We are assured of a sufficient supply for the coming winter.

*Employee Patients.* Besides much voluntary assistance from patients, the institution paid \$26,000 to 100 ex-patients employed on part time, including pupil nurses. This was in addition to board and laundry. It is quite impossible to adequately estimate the value of the voluntary aid or to thank each individual. We know it to be great and that it reflects the spirit of mutual helpfulness, always considered the unique feature of our institution.

It is appropriate here to mention with gratitude Mr. Armstrong's long and faithful service in coping with the trials of administration, and Miss Agnes S. Duggan, who has been housekeeping supervisor since the resignation of Miss Colgate, a position for which Miss Duggan has proved herself to possess the admirable qualities that compel respect.

*Donations.* The total sum received from the generous friends of the sanatorium was \$24,484.73, within three dollars of the amount given in 1924 to the General Fund. Contributions to this and other funds, not including the Free Bed, Organ and Foundation Funds, came from 219 individuals, as compared with 187 in 1924, which is evidence of a widening circle of supporters.

*Endowment Fund.* On the occasion of the Fortieth Anniversary some publicity for our needs was obtained in the New York press. Unsolicited gifts of \$4,475 have been added to the Endowment Fund. On the death of our late friend and Trustee, Mr. Edmund Penfold, the legacy of his brother, Mr. William Hall Penfold, became available to the Sanatorium and the sum of \$22,259.19 was received. Mr. Edmund Penfold himself bequeathed \$25,000.00 which will become available in 1926.

*Free Bed, Memorial and Nominated Bed Funds.* The drafts upon these funds serve to keep away worry from many patients who need some assistance, especially when requiring infirmary care. Last year the Thursday Evening Club under the leadership of some of the patients inaugurated an *Alumni Free Bed Fund*. Former patients are asked to contribute annually small sums to be used, especially for infirmary expenses. They have raised \$344.75 thus far. This praiseworthy act insures a further source of annual income for such relief.

There were 29 patients given free care for fourteen to a hundred and ninety-nine days, while 20 were selected for Memorial and Nominated Beds for seventeen to a hundred and eighty-four days. The total expended for these patients was \$9,323.99. Every effort is made to discover those for whom a few weeks or months of help will lift a load of anxiety.

*Construction and Improvements.* The principal additions to the Sanatorium in 1925 were the new organ contributed by ex-patients, the alcove housing it, and additional rooms to the roentgenographer's cottage. A large amount of road and grading work was made necessary by the new Ludington and Gillender Memorials. The planting and landscape work of exceptional merit was voluntarily planned and supervised by Mrs.

Charles R. Armstrong, to whom we owe much for her devoted service in beautifying the grounds over a period of many years.

Altogether, \$18,659.97 was spent on buildings, improvements and additions, one-third of which was covered by special contributions and the rest from the General Fund. The proposed porch for the Inslee Cottage was deferred until December, as was also a new laundry mangle authorized in the summer.

The new animal house contributed by a friend interested in research and a cottage for the bacteriologist are under construction.

*The Ludington Memorial.* This model structure was completed and opened for patients April 10, with every one of its 32 beds filled. Mr. Ludington has not only furnished it with beds and chairs of walnut finish to avoid the suggestion of hospital, but he has provided pictures for each room, chiefly oil paintings. Electric elevators and heated tray carriers are used and each room is connected with a silent call system and equipped with radio ear-sets, bed-lamps, etc. The kitchen is fully equipped and there are rooms for four nurses, six maids and a janitor on the ground floor.

The design and execution reflect great credit on the architects, Scopes and Feustmann, who have long specialized on sanatorium construction from intimate knowledge of the needs. The building is also a credit to the builders, Branch & Callanan, who have taken pride in its excellence.

*The Medical Department.* It has been a gratification to the medical staff that infirmary beds for nearly one-third of the patients are now available. This enables the fairly prompt removal of any patient requiring bed care from the cottages to one of the infirmaries. On the other hand, it offers a temptation to accept patients who are likely to need such care

Condition.	Cases.	Per cent.
Not classified . . . . .	3	0.9

(no detailed report) . . . . .	16	
	330	

and hence, as a rule, are less favorable for ultimate recovery. Furthermore, the pressure of the waiting list has not permitted a longer average stay than seven months. By the doubling process and in the mid-summer season, 183 patients were accommodated for several weeks, thus prolonging their stay.

The total treated was 502, of whom 330 were discharged. Of 235 patients remaining over ninety days the average term of residence was two hundred and seventeen days, or seven months. There were 16 others who remained as convalescent patients, an average of ten months. Three hundred and fifty-nine new patients were examined at the Sanatorium.

Patients treated and discharged were classified as in table on page 8.

Thirty patients served in the army, navy or marine corps during the World War.

The following states and countries were represented: Alabama, 1; Connecticut, 4; Delaware, 1; District of Columbia, 12; Florida, 1; Georgia, 2; Illinois, 1; Indiana, 1; Iowa, 1; Kentucky, 2; Maryland, 2; Massachusetts, 9; Michigan, 3; Minnesota, 3; Missouri, 1; New Jersey, 27; New York (exclusive of New York City), 78; New York City, 116; North Carolina, 2; Ohio, 12; Pennsylvania, 17; Porto Rico, 1; Rhode Island, 1; South Carolina, 1; Vermont, 1; Virginia, 2; West Virginia, 2; Wisconsin, 1; Canada, 6; China, 1; Denmark, 1.

*Staff Changes.* Dr. Benjamin L. Brock succeeded Dr. David A. Cooper as second assistant, and Dr. Reuben J. Erickson has been received as a clinical fellow. Dr. Cooper became an interne in the University Hospital, Philadelphia. Dr. Foster J. Murray was appointed an examining physician for Brooklyn.

It is only just to mention here the devotion of the medical staff and their watchful care over the patients who need individual instruction, a matter of increasing difficulty as the institution has grown larger.

*The D. Ogden Mills Training School for Nurses.* There were 11 pupil nurses accepted for training in 1925 and 13 were graduated, 6 of whom are taking affiliated courses elsewhere. The graduation exercises were held in the Baker Chapel August 20, and the nurses were addressed by the Rev. E. L. Parrott of Jackson, Michigan.

There are 21 nurses in training and it is expected that 8 will be graduated in 1926. Four graduate nurses have been employed much of the year as substitutes for pupils who were ill or on vacations.

The added cost has been met by increasing the charge from \$7.50 to \$10.00 per week for infirmary care. The housing of more nurses has required the use of Liberty Camp, previously occupied by male employees. The spirit and quality of the nursing is exceptionally good under the guidance of Miss Amberson, Miss Sawtell and their assistants. The most pressing need of the school is an enlarged home for the pupil nurses.

A study of the nurses' routine by our medical staff has not resulted in any reduction of their duties, as was hoped. The verdict is that the

modern treatment of tuberculosis has become more elaborate and therefore brought more varied duties for nurses.

*Report on Graduates.* Of the 65 nurses graduated from the school thus far, 26 are engaged in nursing, 16 are married, and only 2 have died. Of the remainder, 9 are unoccupied or not in nursing, 6 of whom are taking treatment or resting; 6 are taking affiliated courses, and 6 have not been heard from.

*The X-ray Department.* The expansion of this department has been continuous. There were 7264 examinations made and 24,000 films used in 1925. The volume of work done and its importance to the community as well as to the Sanatorium could only be realized if it were to be suddenly suspended. The nominal fees charged bring it to the aid of physicians and patients in the nearby towns who would otherwise go without a thorough diagnosis.

Mr. Homer L. Sampson, the roentgenologist, continues as the valuable and popular director. Research work has been carried on in the study of pulmonary and intestinal tuberculosis.

*Research and Clinical Laboratory.* Activity in this branch of our institution is enhanced by the added support given by two gentlemen. The desire of these generous friends to contribute to the progress of knowledge of tuberculosis led to an offer to subsidize the research department for a period of three to five years. In addition to this, one of them has contributed a new animal house, now nearly completed. It is a brick, fireproof building, harmonizing in construction with the laboratory and situated behind the Scholfield Workshop. The work will be facilitated by this building and it has released a room in the laboratory formerly used for animals but now equipped as a private research room. The staff has been stimulated by Dr. Petroff and much interest evoked by his example. During the year Mr. Frank B. Cooper has continued as chemist, and Dr. F. W. Stewart and Mr. Lamont West left to continue their studies elsewhere. Dr. D. M. Gay became research bacteriologist and pathologist, following a sojourn as a patient. Dr. C. P. Rhoads, also an ex-patient, was awarded a fellowship in bacteriology and another technician was added to the clinical laboratory staff because of the increased number of patients. The published work in this department continued the study of immunity, to which Dr. Petroff and Dr. Stewart made an interesting contribution recently published.

The opportunity for research in tuberculosis now offered by the increased support places the laboratory in a most favorable position to enlarge our knowledge of this disease. We fully acknowledge the obligation we are under to our two friends, who have a vision of these possibilities.

Among others Dr. Whitney and Dr. Coolidge of the General Electric Company's research laboratory have given much helpful advice and apparatus to Dr. Petroff in his experiments.

The Hanovia Chemical and Manufacturing Company, through Mr. F. W. Robinson, has also kindly presented valuable quartz burners for experimental work, and to all we are duly grateful.

*The Saranac Laboratory.* Dr. Gardner has carried on his studies of dust diseases, and in conjunction with the United States Public Service and the Veterans' Bureau Hospital at Tupper Lake has been enabled to investigate a great variety of pathological material. Dr. David T. Smith of the Rockefeller Institute and Dr. Charles H. Haskins have been associated with Dr. Gardner and have voluntarily rendered skilled aid. Dr. Willar B. Soper has published his results on experimental meningitis and Dr. Edgar Mayer and Mr. Morris Dworski on ultraviolet-light effects, all of whom are continuing their studies.

*The Elizabeth Milbank Anderson Research Fund.* The maintenance of the Saranac Laboratory for the past five years has been borne by the Milbank Memorial Fund. It is a great satisfaction to report that the Trustees of that fund have renewed their pledge of \$5000 annually for a further period of five years. This insures the continuance of the pathological research work as well as other activities connected with the Trudeau School of Tuberculosis. We desire to express the profound appreciation of the staff and of the local specialists who avail themselves of the laboratory's facilities.

*The Scholfield Memorial Workshop.* A quite remarkable growth in interest was achieved last year under the tireless direction of Miss Alma Pierce, Miss Lillian Hunt and Mr. George Chapman. More than twice the usual number of persons, or 274, were given instruction, including 31 infirm patients and 16 nurses. Voluntary assistance was rendered by Miss Louis Pearson, Mr. Arthur Van Buskirk and Mr. Theodore Gilman, all patients, who visited the infirmaries with much regularity to teach some of the crafts. Mr. George Chapman devoted much time to teaching jewelry making, while Miss Celeste Lucas, the former director, while visiting during the summer taught leather tooling. It is an especial pleasure to acknowledge the remarkable stimulus given to our arts and crafts by Sister Olive Frances of the Convent of St. John the Baptist in Ralston, N. J., who made three visits to teach illuminating and lettering. We are under genuine obligations to her for reviving the interest in this art and for the free-will service. The diversity of crafts has increased and the choice placed before the patients provides very helpful recreation. They worked altogether 9876 hours in 15 different crafts.

Through the efforts of Miss Pierce contributions to a fund to provide for a paid bedside instructor amounted to \$377.50.

The record for the past year deserves just praise for Miss Pierce, who received her own training while a patient. We are also not unmindful of the sustained help furnished by Mrs. Meredith Hare, the donor of the building, who has contributed yearly to its support.

*The Medical Library and Statistical Department.* These activities are always extending under the conscientious direction of Miss Ross and Mr. Hennigar. The librarian has been called upon to do much reference work for the staff. The accessions amounted to 664 volumes, 317 of which were donated by Dr. Lawrason Brown. Miss Blanche Gifford has aided Miss Ross very faithfully. The statistics of nearly 7000 patients are now available. Mr. R. F. Remsen assists in the Statistical Department.

*The Mellon Library.* The Mellon Library has continued to grow largely through the efforts of Mrs. Lawrason Brown, who has secured donations of both money and books.

*The Baker Memorial Chapel.* The ninth anniversary memorial service was conducted by the Rev. G. K. Newell of the Saranac Lake Presbyterian Church. Rev. E. P. Miller and Rev. E. B. Brownell continued their rotating services, while Rev. Father Gallagher presides at the Roman Catholic masses. Rev. John Bailey Kelley, of Montclair, N. J., and Rev. William F. C. Nelson, of Rochester, N. Y., were helpful with Sundays otherwise unfilled.

The new organ was installed and a new carpet laid during the spring in time for the graduation exercises of the nurses.

Mr. W. A. P. Hennigar, who was largely instrumental in raising funds for the organ, is our organist. We were favored with several recitals by Prof. Wm. T. Dunn, of Minneapolis, Minn., while he was with us as a patient.

*Entertainments.* On February 19, approximately forty years since the opening of the first cottages, a dinner and costume party were held and cleverly arranged by the patients to represent the period of 1885. Speeches were made by Mr. George Johnson, one of the original employees and a guide for Dr. Trudeau; also by Al McKenzie, another veteran guide frequently mentioned in Dr. Trudeau's reminiscences, and by Ell Kelly, superintendent of grounds and oldest employee of the institution.

Other occasions of interest and enjoyment were the two symphony orchestra concerts again furnished by Mr. Melvil Dewey of the Lake Placid Club, and one by the Riverdale School Glee Club on their annual canoe trip. To both we owe thanks and appreciation.

Through the diligent labor of Mr. John Dalton, a patient, and the interest of Dr. Heise in radio service for the patients, microphone transmitters connected with both infirmaries and all the cottages have been placed in the chapel, parlor and dining room. The bed patients are thereby enabled to hear all the music, sermons, lectures, etc., if they choose. The new Ludington Infirmary was wired for radio receivers in each room during its construction.

*The Thursday Evening Club.* The Thursday Evening Club has had exceptional entertainments under the leadership of a group of patients, among whom Mr. William W. Oliver, Mr. Edward Anthony and John

Dalton merit special mention. Recently the club made a contribution of \$100 toward a motion picture machine which is now in use in the dining room. Miss Dorothy Forbes, of Boston, has kindly contributed the cost of films for three months, so that ample recreation is now available for all patients. The great need of a suitable hall or theater for their gatherings was more than ever manifest last year.

*The Trudeau School of Tuberculosis.* The last session was the eleventh six weeks' course held in the past ten years. As heretofore, a full attendance of 25 regular students was present. Fifteen other young physicians, all patients, attended the exercises. They came from all parts of the United States and four foreign countries. One-half of the number had some personal history of tuberculosis. Five received scholarships. It is noteworthy that recent classes have shown more aptitude for the instruction. Doubtless one reason is that our staff has acquired more experience in teaching. The eleventh class kept up the custom of presenting \$100.00 for a scholarship.

Fifteen physicians are enrolled for the twelfth session.

As this marks the end of the period of ten years of support which Mr. Samuel Mather has so generously given, the question of maintaining the school after 1926 will have to be met in due time. We express the hope that the support will be found so long as the value of this post-graduate study can be demonstrated.

The responsibility placed upon us has been unique in many ways and the opportunity for service a far-reaching one for the entire group of physicians gathered here, both in and out of the institution.

The visiting lecturers at the last session were as follows: Dr. David A. Stewart, Medical Superintendent, Manitoba Sanatorium, Ninette, Man., Canada: "Intestinal Tuberculosis;" Dr. William R. P. Emerson, President of the Nutrition Clinics for Children, Boston, Mass.: "The Factor of Underweight in Children and Tuberculosis;" Dr. Allen K. Krause, Associate Professor of Medicine and Director Kenneth Dows' Fund, Johns Hopkins Medical School, Baltimore, Md.: "Human Resistance to Tuberculosis at the Various Ages of Life;" Dr. Joseph Walsh, Medical Director White Haven Sanatorium, Philadelphia, Pa.: "Studies in the Pathology of Tuberculosis of the Lungs;" Prof. James Alexander Miller, College of Physicians and Surgeons, Columbia University, and Director of Tuberculosis Clinics, New York City: "Experiences in the Diagnosis of Non-Tuberculous Pulmonary Disease;" Dr. John A. Lichty, Medical Superintendent Clifton Springs Sanitarium, Clifton Springs, N. Y.: "Carcinoma of the Lung."

*The Edward L. Trudeau Foundation.* Twenty-five ex-patients were maintained last year, of whom 21 received their entire support from nine to fifty-two weeks. Ten fellowships were granted, 4 as clinical assistants and 6 as laboratory workers, and there were 6 voluntary assistants. The eighth number of the "Studies of the Trudeau Foundation" contains

7 contributions. Donations to current income amounted to \$8450, of which \$6950 came from the Trudeau Sanatorium Tuberculosis Research Fund given by two anonymous friends. Contributions to the Foundation endowment were \$1100, and apparatus to the value of \$64.80 was received.

*Dental Department.* The volume of work done by Dr. William Gardner, the resident dentist, is shown by a few statistics:

Number of prsons examined . . . . .	382
Number of complete mouth <i>x</i> -ray examinations . . . . .	375
Number of defects found . . . . .	925
Number of treatments given . . . . .	1073

The value of expert service of this kind in the institution needs no comment; it has an important influence on the progress of the patients toward recovery. The department is self-supporting on the small fees charged.

We desire to acknowledge the interest and coöperation of Dr. John A. Munroe of Saranac Lake who has acted as a consultant and advisor to the Dental Department.

*Necrology.* The death of *Mr. Edmund Penfold*, of New York, one of the earliest friends of Dr. Trudeau and a Trustee since the death of his brother in 1915, occurred February 4, 1925. Suitable resolutions were recorded at the spring meeting of the Board, which testified to the generosity and kindly interest of Mr. Penfold and his family since the foundation of the Sanatorium.

*Dr. Henry M. Thomas*, of Baltimore, died on June 21, 1925. He was a former patient of Dr. Trudeau's and for thirty-five years a close friend and an examining physician for the sanatorium, whose enthusiasm and help was an inspiration to many patients.

*Mr. William W. McAlpin*, of New York City, died on September 19, 1925. He was also a former patient of Dr. Trudeau and one of the most attractive early cottages in the Sanatorium was donated by Mr. and Mrs. McAlpin in 1890.

*Immediate Needs.* They remain much the same as last year, viz.:

Additional nurses' dormitory . . . . .	\$35,000 to 50,000
Staff dormitory (12 to 15 beds) . . . . .	25,000 to 40,000
<i>Less Urgent Needs:</i>	
New reservoir and pipe line . . . . .	10,000
Amusement pavilion . . . . .	50,000
Refurnishings . . . . .	5,000
Concrete service road . . . . .	500

EDWARD R. BALDWIN, M.D.,

PER CAPITA COSTS.

The total Sanatorium operating income for the year 1925 was \$279,480.02, against total operating expenses of \$323,759.13. The Superintendent's revenue over the same period was \$212,370.89 as against running expenses of \$269,933.26; resulting in a deficit of \$57,562.37, which was offset by appropriations from the Banker's Trust Company amounting to \$69,210.88. The Superintendent's revenue equals 79 per cent of the running expenses. The average weekly per capita cost, or the cost of taking care of one patient one week, was 25.81. The average amount paid by each patient was \$19.61, and the average weekly deficit per patient was \$6.20.

The distribution of the average weekly cost per patient was as follows:

Administration Expense	\$1.23	5 per cent
Housing and Feeding	15.71	61 per cent
Professional Care of Patients:		
Medical	\$1.06	
Nursing	7.59	
Dental	22	
	8.87	34 per cent
	\$25.81	

The average daily census was 197, including 27 convalescent patients, and the total number of hospital days 71,778. The average raw food cost per meal was \$0.304 and the total number of meals served was 321,403.

## MEMORIAL AND ENDOWED FREE BEDS

---

The sum of five hundred dollars (\$500.00) will establish a Free Bed for any period of six months' treatment, as a memorial if desired; or

An Endowed Free Bed may be established in perpetuity to be occupied for such number of hospital days as shall be covered by the income from the endowment given for the purpose.

Such gifts to be named by the donor, and the applicants for the privileges to be subject to the same requirements in the entrance examination, rates for board, and all other rules and regulations existing at the time for patients of the Sanatorium.

### FORM OF BEQUEST

I give and bequeath to "THE TRUDEAU SANATORIUM" of Essex County, State of New York, incorporated under the laws of the said State of New York the 4th day of March, 1889, the sum of                      dollars: To have and possess the same unto the said "Trudeau Sanatorium," its successors or assigns, to the uses, disposition and benefits thereof forever.

NOTE.—If the bequest is intended for the research and teaching departments the form should be amended by inserting "The Edward L. Trudeau Foundation of the" before the words "Trudeau Sanatorium" where they occur in the above.

### FORM OF DEVISE

I give and devise to "THE TRUDEAU SANATORIUM" of Essex County, State of New York, incorporated under the laws of the said State of New York the 4th day of March, 1889, all that certain piece or parcel of land (with the buildings thereon erected), situated, lying and being, etc. (here describe property): To have and to hold the same unto the said "TRUDEAU SANATORIUM," its successors or assigns, to its own use and behoof in fee simple absolute.
